

Better patient compliance.

Faster recovery.

More FUN!

SportSwings™
BETTER THAN CRUTCHES

STABILITY with MOBILITY

Our patented Big Foot is 6-7 times bigger than most crutch tips and articulates for exceptional stability. Front and rear shock-absorbing dampeners decrease stress from walking, and the foot's "grippy" tread offers superior traction.

SWINGLINK SAFETY TETHER

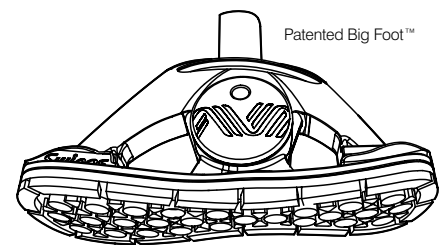

Our patented SwingLink™ safety tether links the SportSwings frames to work in unison. This creates a pre-set stride for greater control — and significantly **reduces the risk tripping, falling, and slip-outs.**

COMPRESSIVE HANDGRIP

Palm-down handgrip engages forearm muscles, reduces pressure on wrist and fingers. Ideal for patients with arthritis or hand injuries. Stationary design reduces wrist pronation. More comfortable, less hand fatigue.

COMFORTABLE AXILLA

The SportSwings axilla follows the natural curve of the armpit. It's more comfortable than a traditional axilla because it distributes weight evenly.

ABOUT US

Our innovative mobility devices keep people moving with dignity and vigor — and help them feel more in control. Invented by a world-class athlete who spent 1000+ days on traditional crutches, canes, and walkers.

PRODUCT DETAILS

Model No. L13 — SportSwings

SMALL (L13SM)

For persons 4' 6"-5' 6"
(137 cm - 168 cm)

MAXIMUM DEVICE CAPACITY
300 lbs. (136 kg)

COLOR — **Electric Green**
with Black handgrips and foot treads

MED-LG (L13ML)

For persons 5' 2"-5' 10"
(157 cm - 178 cm)

MAXIMUM DEVICE CAPACITY
300 lbs. (136 kg)

COLOR — **Royal Blue**
with Black handgrips and foot treads

TALL (L13TL)

For persons 5' 10"-6' 6"
(178 cm - 198 cm)

MAXIMUM DEVICE CAPACITY
300 lbs. (136 kg)

COLOR — **Space Black**
with Black handgrips and foot treads

“ . . . allows for a more normal gait *without loss of momentum or a long recovery phase* that is seen with crutches. ” — Dr. Matthew Langenderfer

KEY PARTNERS

We are partnering with all major retail, DME, and omni-channel marketers to develop a global footprint. We invite you to join us in providing mobility aids that can help people around the world.
